

# Use CONFIRMATION for all of your bank's responses

If you're already responding to some auditors, credit managers, and others with CONFIRMATION, it's easy to take the next step to respond exclusively through our platform. That means that every confirmation request sent to your bank will come in through CONFIRMATION. Banks that use our platform exclusively report huge time savings for staff, a noticeable increase in response accuracy, and much quicker response times back to auditors—all of which provides a better experience for your clients.

## By the numbers

**14**

of the top 15 U.S. banks use CONFIRMATION exclusively

**90%**

time saved on responding to confirmations

**200K**

auditors already use CONFIRMATION, with more signing on every day

### Save time

One U.S. bank recently reported that, after using CONFIRMATION exclusively, their time spent per confirmation went from 15 minutes to 3 minutes. When responding to thousands of confirmations per year, that really adds up! CONFIRMATION saves you time by eliminating duplicate requests from auditors, reconfirmations, and duplicate billings to your clients. It also eliminates paper, which often has to be scanned, cross-checked, forwarded, faxed, or mailed.

### Gain insights

CONFIRMATION provides one central location for managing all your responses. Here you can see the status of all work in process and improve tracking and accountability on each item.

### Stay secure

CONFIRMATION's platform exceeds industry security standards and passes more than 450 client security audits each year. Can you say the same about mail, email, or fax? Your clients' information is safer here. Plus the risk for fraud is drastically reduced.

### Get started

CONFIRMATION makes it easy to respond exclusively through our platform. Auditors will be able to see your bank's exclusive status right in our platform, and we'll send you materials to provide to auditors who still send in confirmation requests the old way.
